August 7, 1944

Dear Mom:

Well I'm back in school again. We get up at 6:30 each morning eat and fly till 12:30 then eat again, spend the afternoon going to ground school, PT and tank trainer. Were flying little single engine AT-6's. They seem almost like toys after the 17 but they don't give us any time to play. The course is a little too rough to suit me.

Were ~~like~~ located in the Brazos river flats, they say its the hottest place in the world and I'm inclined to believe them I've never found a hotter place.

I got a pleasant surprise the first day I went down to fly. who did I find in the same sqdn with me but Brennan, the same Brennan who went all through flying school with me. He has been down in Africa and Italy for a year flying B-17's.

I also met an M.P. on the base who was a student in ~~B~~ Primary with me and washed out.

G hats all the news for now.

Love Charlie
